## Installation & Operating Instructions

1. Unzip SESBackup.zip and install by executing the setup.exe application
2. Run SESBackup
3. The main screen (shown below) is where all the action takes place.

4. By selecting a folder from the list on the left SESBackup will list all session files in all folders below the selected folder.
5. If you accidentally select the wrong folder then simply 'select all' the session files and then select 'remove'. This only removes the session files from the list it DOES NOT delete them from the disk.
6. The session files can be sorted by selecting the individual column titles eg "Bytes" will sort by file size etc.
7. Selecting "Backup" will make a copy of each selected session file. The session files will be backup to either "Source Folders" or a user selected "Specific Folder".
